## Fossils and Earth's History Conclusion

✓ **Question:**

How do fossils and sedimentary rocks show Earth's history?

✓ **Standard:**

7.2.8 Compare and contrast fossils with living organisms in a given location to explain how earth processes have changed environments over time.

1. There are many different correct answers to this question.
  - a. Give at least **two answers** to this question.
  - b. Analyze data you collected from the investigation.
  - c. Your data can also come from researching the text, videos, and the Internet.
  - d. Be sure to include information about sedimentary rocks and fossils.
2. Relate your answer about Earth's history to
  - a. climate/environment
  - b. organisms (plants and animals)
  - c. geologic processes
3. Follow the CER/RACE guidelines and rubric.
  - a. You already used this graphic organizer to plan out your answers.
  - b. Your score will be an average since you will have two answers.

\*If you need more room, add another page after this one.
